

HL100

➔ HL100 - Fingerprint Lock

Technical Specification

Case Material : Zinc Alloy, Cast Steel lock bolt
Lock body : American Standard Cylinder
Identification Mode : Fingerprint / Pin
Battery : 4 AA Batteries
Operating Voltage : 4.5V – 6V
Fingerprint Capacity : 100
Pin Capacity : 100
Battery life : ≥ 2000 unlock times
Identification Time : ≤ 2 seconds
Working life : ≥ 200 thousand unlock times
FRR : ≤ 0.01
FAR : ≤ 0.0001

Features:

Advanced biometric technology.
Rugged steel construction.
Illuminated keypad entry.
Can be opened by fingerprint, PIN or key.
100 user fingerprints or PIN capacity
American standard cylinder
External battery backup connector.
Low battery warning
Reversible lever for left or right operation
Easy to install with no wiring required
Warning when the door is not secured.
