

Premier Software & Peripherals

Wintex Software

Texecom's user-friendly Windows™ based software provides complete upload/download & systems diagnostics for total control & flexibility.

Windows is a registered trademark of Microsoft Corporation

Texbase Software

Alarm management software package for use in conjunction with the Premier Com IP & Montex Software. Allows installers to individually monitor their installed security systems for specific alarm signals.

Montex Software

Software based alarm receiver interface for connecting with Premier ComIP alarm signalling equipment. Supports fast format, contact ID & SIA communication protocols. Manages received polling information for each monitored site.

Key-Fob Programmer

The Key-fob Programmer allows configuration data to be copied from one control panel to another. This allows for customised default settings, reducing programming time & simplifying set-up of multiple installations.

European Standards

PD 6662 & EN 50131 Grade 2 Environmental Class II.
 Conforms to European Union (EU) Low Voltage Directive (LVD) 73/23/EEC (amended by 93/68/EEC) and Electro-Magnetic Compatibility (EMC) Directive 89/336/EEC (amended by 92/31/EEC and 93/68/EEC).
 Approved to BS EN 55022 Class B & BS EN 50130-4.
 The CE mark indicates that this product complies with the European requirements for safety, health, environmental & customer protection.

Premier Series Communicating Control Panels

The Premier Series is a powerful range of communicating control panels. Modular expandable design enables simplification of complex requirements, allowing maximum flexibility & ease of operation. Each feature and function is fully customisable delivering outstanding design flexibility & exceptional performance. The same intuitive programming platform & peripheral devices ensure instant product familiarity across the range.

Premier 412

4 Zones Expandable To 12
 Integrated Communicator
 32 User Codes
 2 Partitions

Texecom

Designed to Perform

Premier Keypads

The range of compatible LED or LCD keypads is used to programme all required features, enabling the set-up of even complex systems quickly & efficiently.

LED Keypads

RKP4/8/16

4, 8 & 16 zone LED remote keypads.

RKP8Plus/16Plus

8 & 16 zone LED remote keypads incorporating 2 EOL zones.

LCD Keypads

LCD/LCDP

Remote keypads with standard 32 character LCD display. Incorporates 2 DP or EOL zones & 1 programmable output. LCDP features built-in proximity tag reader.

LCDL/LCDLP

All the features of the LCD/LCDP plus large 32 character LCD & a speaker driver output for programmable volume control. LCDLP features built-in proximity tag reader.

Premier Elite Keypads

Premier Elite Flush & Surface Mount

Flush and surface mount keypad options. Large blue LCD screen with touchtone backlit keys. Built-in proximity tag reader. Polished chrome, Satin chrome, Diamond White, Polished Brass, Gunmetal and Diamond Black finishes available.

Premier Elite LCDLP

Large blue LCD screen with touchtone backlit keys. Built-in proximity tag reader.

Proximity Tag

Proximity tag for use with LCDP & LCDLP remote keypads.

Premier Communicator Modules

The range of compatible expander modules allows modular system design, ensuring maximum flexibility & future-proof installations.

Premier 8X

Remote Zone Expander providing an additional 8 programmable EOL zones, 2 programmable outputs plus speaker driver with programmable volume control.

Premier 8XE

Local plug-on 8 Zone Expander provides an additional 8 programmable EOL zones.

Premier RM8

Relay Module providing an additional 8 relay switch options.

Premier 60iXD

Expansion module providing two ID[†] loops each supporting 30iXD[†] biscuits.

[†] iD is a trademark of Novar Systems Ltd.

Additional Communicator Devices

Premier ComIP

Allows connection of any Premier control panel to a Local or Wide Area Network (LAN/WAN). This allows alarms to be signalled over an IP network to an alarm receiving centre via Texecom's Montex Software.

Premier Speech Module

The Speech Module provides two recordable 12 second audio messages. Each message is assigned to an alarm channel, which in turn can be triggered from one of the many output functions of the control panel.
