

Wireless Automatic Curtain Controller

WL-WCC-01

Main features:

Intelligent ultra silent design and high precision AC motor, super lubricated and muted slide way IOT wireless(Zigbee)control, it can be controlled by mobile phone, tablet computer, button remote or short range control with unlimited distance.

Used for straight rail or arc-shaped curtains, slide way is 18m at maximum, safe load of the dynamo is 60kg, rated power of the dynamo is 60W.

Motor automatic memorized distance positioning system. It can automatically stop(not collision stop) when it is in place. No wearing operation. Super long lifetime.

The third generation dynamo electromagnetic clutch; automatic separation and union; dual use by manual or by electricity; the curtain could be pulled easily no matter the power is on or off

Slide way uses ultra silent and super lubricated design; built-in steel wire rope and synchronous belt drive; large bearing capacity and mute operation

Hand starts function; slow start and slow stop function; operation is more smooth.

Slide way interfix function; it can set two common stop sites for the curtain; standardized lighting regulation.

Ordering Model	WL-WCC-01
Power Supply Voltage	220VAC/50Hz
Load Capacity	35KG
Max Width	18m
Velocity	18cm/s
Power	80W
Electric Current	0.36A
Control Mode	Zigbee
Protection Grade	Ip41
Running time	4min
