Wireless Security Socket —Wall Mounting

WL-WWS-2 is a wireless intelligent socket which can be controlled remotely. It can be bound with other devices to control the on-off of the relay. The device can be controlled manually, it can also be controlled remotely or in short range by mobile phone, tablet and touch pad. Besides, it is compatible with IEEE802.15.4 ZigBee/SmartRoom HA protocol and suitable for any ZigBee/SmartRoom HA protocol network.

WL-WWS-2 adopts global initiative security technology of socket. Powered on, the plugged home appliances can work. It will be powered off once the plugs are pulled out. The device has extraordinary effects for preventing children's misplug and electric shock.

Main Features:

- Compatible with ZigBee/SmartRoom smart home automation profile
- Built-in router function
- Current overload protection
- Easy installation and usage and fully compatible with existing standard socket
- Can be controlled by all the controllers compatible with ZigBee/SmartRoom
- NFC-enabled control

Technical Parameter:

Jack Socket	Five-hole
Specification	86 type
Bandwidth	2.4~2.4835 GHz
Communication Mode	IEEE802.15.4(ZigBee/SmartRoom)
Communication Distance	50 m
Working Temperature	-10~50℃
Working Humidity	Max 95%RH
Power Supply Voltage	110~220 VAC 50/60 Hz
Rated Current	10A
Color	White
Material	Inflaming retarding PC material
Product Dimension	86MM*86MM
