

Premier Elite AM 360DT

Ceiling Mount Anti Masking Dual Technology Detector

Texecom

Enhanced detection security for high-risk applications

High-risk applications require high performance solutions. The Premier Elite AM 360DT offers Grade 3 dual technology ceiling mount detection for reliable catch performance, together with active IR anti-masking to protect against sabotage.

Outstanding features include:

- 9m maximum diameter coverage pattern
- Mounting height up to 3.6m
- Omni directional quad element pyro
- Adjustable K-band microwave detection
- Active IR anti masking
- Digital temperature compensation
- EN50131-1, EN50131-2-4 , PD6662:2010 Grade 3 Class II

Active IR Anti-Masking

The Premier Elite AM 360DT utilises Texecom's optically enhanced Active IR technique, the most secure and reliable anti-masking technology on the market.

The Active IR LED power output provides 100% lens coverage protection and, when combined with Texecom's proprietary digital signal processing algorithms, delivers exceptional anti-masking pick-up whilst actively discriminating against false masking sources.
