equiP® SERIES HIGH DEFINITION 1080p MFZ LENS TRUE DAY/NIGHT INDOOR MINIDOME IP CAMERA

Honeywell's latest addition to the equiP® Series of IP-based products, the HD3HDIH is a high definition, True Day/Night indoor fixed minidome network camera engineered to provide extremely crisp images at minimal bandwidth. The HD3HDIH provides 1080p (1920 x 1080) resolution at full frame rate. Progressive scan technology and 2D edge enhancement provide outstanding clarity and definition. Digital Noise Reduction (DNR) results in significant storage savings without sacrificing image quality in low light. The 1/2.7" progressive scan CMOS sensor offers the latest in digital video surveillance technology with accurate color rendition through a wide variety of lighting conditions. The HD3HDIH also supports the PSIA specification for interoperability between network video products.

The compact, one piece design provides fast and easy installation in any application. The camera comes complete with surface and flush mounting options (compatible with a 4S electrical box) and an optional wall/pendant mount kit is available.

In addition to the low-light color performance, the camera will automatically switch to black and white. In this mode, lighting can be complemented with infrared for discreet/covert low-light surveillance with exceptional monochrome images.

A 3D axis gimbal capable of 360° of pan, 180° of tilt and 360° of horizontal rotation simplifies mechanical camera adjustment. The Motorized Focus and Zoom (MFZ) lens allows the field of view to be adjusted to suit the scene requirements.

A powerful and intuitive web client allows fine tuning of the camera and the auto iris levels. This can also be performed from most NVR setup utilities.

The HD3HDIH supports dual video streams and multiple compression formats with frame rates up to 30 frames per second (25 fps for PAL systems). The compression parameters for the two video streams are independently configurable. The primary stream is dedicated to H.264. The secondary stream can be configured for H.264 or MJPEG. The HD3HDIH features analog video out for aiming and focusing during setup.

With built-in low current Power over Ethernet (IEEE 802.3af), power is supplied to the camera using standard network cabling, eliminating the need for a separate power supply and associated wiring. In retrofit situations where PoE support is not available, the unit can also be powered directly from 24 V AC.

Market Opportunities

The HD3HDIH is perfect for installations where excellent picture clarity at minimal bandwidth is required. At three times the resolution of standard analog cameras, yet with similar bandwidth requirements, the HD3HDIH can be retrofitted on many existing NVR installations without requiring additional storage.

Features

- Outstanding image quality, 1080p (1920 x 1080) resolution
- 30 fps (25 fps PAL) progressive scan
- True Day/Night, 3-9 mm MFZ lens with mechanical IR cut filter
- Camera tamper detection
- Video motion detection
- Wall/pendant mount kit available
- Selectable compression formats
- PSIA support
- Dual digital video streams, independently configurable, H.264 and/or H.264/MJPEG
- Remote firmware update
- Supports both dynamic and static IP addresses
- Single model for surface mount and recessed ceiling applications, 4S adapter plate also supplied
- Includes advanced IP locator software to make system setup easy
- Web server for remote setup of camera video and network parameters
- Choice of 24 V AC or PoE IEEE 802.3af power inputs
- Supports input and output alarm contacts
- Supports bidirectional audio

SPECIFICATIONS

Like all cameras in the equip® Series of IP-based products, the HD3HDIH network camera uses Honeywell technology for camera video motion detection, tamper detection, remote firmware updating and for secure storage of all camera settings. Video motion detection recognizes object motion within the field of view; then a simple on-screen notification alerts the user. Camera tamper detection notifies the user when a camera's field of view is altered, blinded or blurred. This ensures the video's integrity and alerts the customer to either a live event or a system problem that is causing disruption to the video stream. Honeywell's technology also allows users to remotely upload firmware to the camera. Setup is quick and easy and can be customized through a web client or from an NVR. The built-in web server provides password protected access to the camera's video and network setup.

System Diagram

SPECIFICATIONS

Operational				Environmental			
Video Standard	NTSC, PAL			Temperature	Operating: 14°F to 122°F (-10°C to 50°C) Storage: -4°F to 140°F (-20°C to 60°C)		
Scanning System	Progressive scan			Relative Humidity	0% to 85%, non-condensing		
Image Sensor	1/2.7" CMOS			IP Specifications			
Number of Pixels (H x V)	1920 x 1080			Video Compression	Dual stream H.264 and MJPEG		
Minimum Illumination	0.18 lux color/0.15 lux BW @ 50 IRE, F1.2 0.11 lux color/0.09 lux BW @ 30 IRE, F1.2			Primary Stream Resolution	Bitrate H.264 (Typical)*	Frame Rate	Storage/Day (GB)
Automatic Lens Control	DC Iris Level 1-25			1920 x 1080	3.0 Mbps	30/25	31.6
Video Output (AUX)	1.0 Vp-p @ 75 ohms			1280 x 720	1.4 Mbps	30/25	14.8
S/N Ratio	50 dB or more (AGC off)			800 x 450	0.75 Mbps	30/25	7.91
Auto Gain Control	Off/On, selectable (20-40 dB)			640 x 360	0.4 Mbps	30/25	4.22
Automatic Electronic Shutter	1/30 – 1/130,000 sec (NTSC) 1/25 – 1/130,000 sec (PAL)			320 x 180	0.2 Mbps	30/25	2.11
Lens Type	True Day/Night (TDN), 3-9 mm Motorized Focus and Zoom, F1.2			Frame Rate NTSC/PAL	Up to 30/25 fps video in all resolutions		
Angle of View		Wide	Tele	Video Streaming	Dual streaming: H.264 and MJPEG Controllable frame rate and bandwidth Constant or variable bit rate		
	Horizontal	93.0°	31.7°	Security	Multiple user access levels with password protection
