

# Digital Wireless Clock Radio Hidden Camera

Simple to install and use!

This covert cube alarm clock radio with digital wireless blends easily into a variety of indoor settings, whether at home or at work.

You'll appreciate the convenience of 2.4 GHz wireless operation — simply plug in the clock into a standard power outlet, plug the included digital wireless receiver into a standard power outlet, and connect to a DVR (for a recorded video) or a TV or monitor (for live viewing), and you're ready to go.

Our expertly concealed 500-line high-resolution camera delivers 0.01 lux, meaning you'll get quality, usable video even in low-light conditions. The digital signal provides a crystal clear image with no interference.

Comes with digital wireless receiver, power supplies, 1-year warranty and 30-day money-back guarantee.
